COMMITTED TO PARTNERING WITH THEIR PATIENTS for better health, all physicians on staff at Bergen Medical Associates have the same goal. They educate each patient, provide preventive care and monitor individual risk factors, while practicing a whole-body approach. This consistent, thorough method of treatment has earned the trust of patients, year after year.

Bergen Medical Associates is a multi-specialty practice, offering comprehensive care for all health concerns, delivered in a compassionate manner. With more than forty board-certified physicians and a highly trained nursing staff, patients have no need to go elsewhere, thereby eliminating some of the stress that often accompanies finding the right doctor or navigating the path to wellness.

With six Bergen County locations, the practice makes it easy for all patients, offering convenient, flexible scheduling, often with access to late night hours, Saturday appointments and same-day appointments. Most insurance is accepted.

Because all physicians at Bergen Medical are under one umbrella, they enjoy working in a collaborative environment with the same end result in mind. This transfers many benefits to patients, allowing easy access of medical records for all doctors and saving the patient from having to spend time on administrative follow-up chores.

Bergen Medical Associates is an efficient, one-stop group for superior health care. Each physician is dedicated to providing personal attention and highly individualized care in a nurturing environment. Patients often forget that the practice is large, as care is delivered with a friendly small-practice mentality.

The doctors at Bergen Medical have often been recognized for their commitment to helping patients achieve optimal health through promoting a healthy lifestyle and disease prevention.
